Why choose the MCM CDX bladders splitter ?

MCM has been a manufacturer, integrator and process consultant since 1990.

The **CDX** processing machine splits, empties, and clean pig bladders neatly and easily. The cut is precise, and the result is as expected.

After the product is pushed on the processing ramp, it is automatically **conveyed** to the opposite end of the machine.

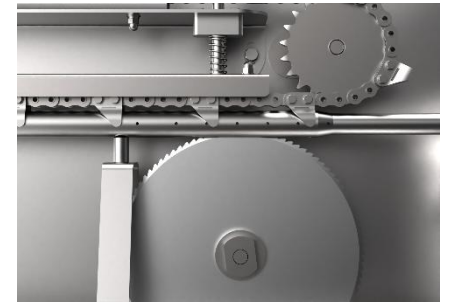

Need to double the processing speed? The twin bladder splitter, **CDX T1**, is made for it.

Designed for **easy cleaning and maintenance**. From lubricating the bearings to adjusting the chain tension, the **CDX** is built to simplify the work of maintenance staff.

Its **compact design** allows for easy integration into your processing line.

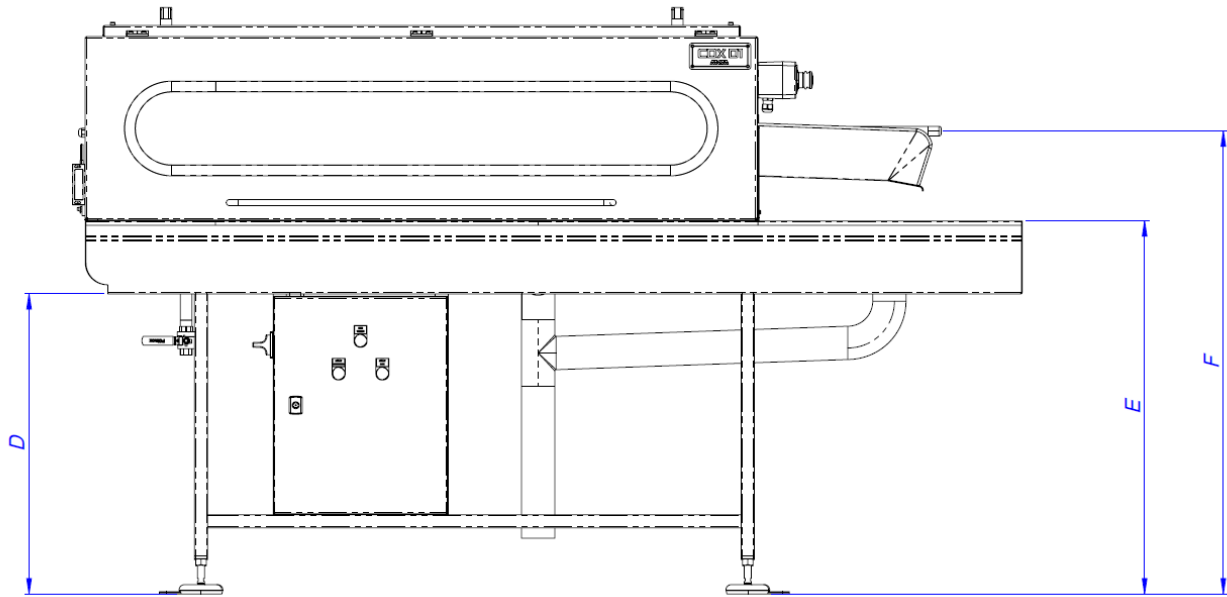

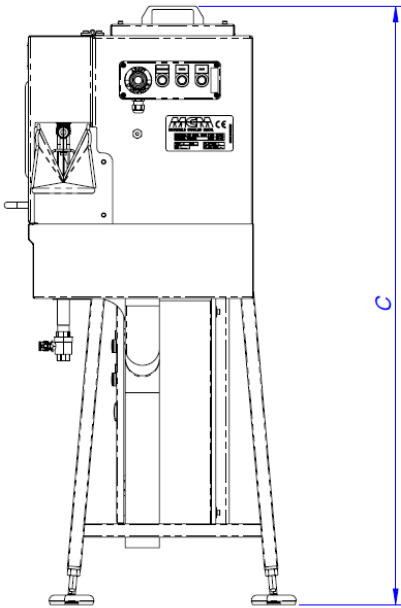

Tailored to your needs.

Since your needs are special to us, your **CDX** is tailored, modified and equipped by our teams.

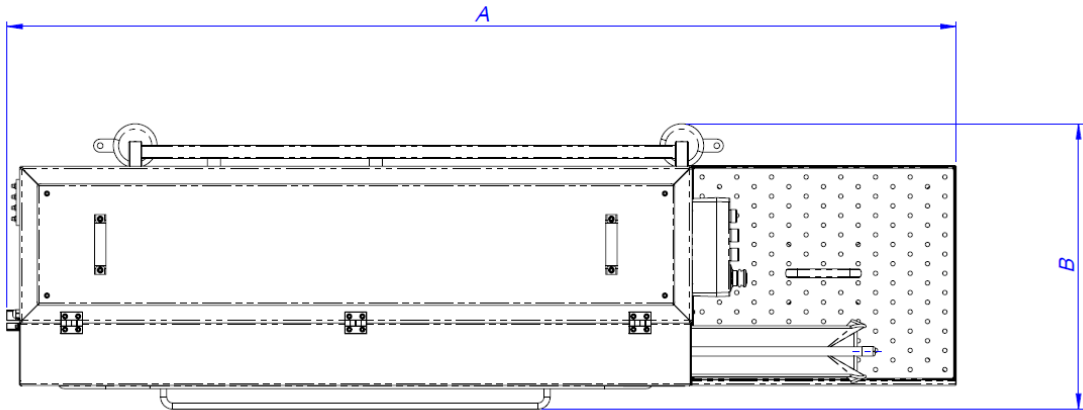

*1 quantity and type depending on the product being processed *2 requires the 'automation' option.

*3 depending on the chosen option(s). *4 contact us for further information.

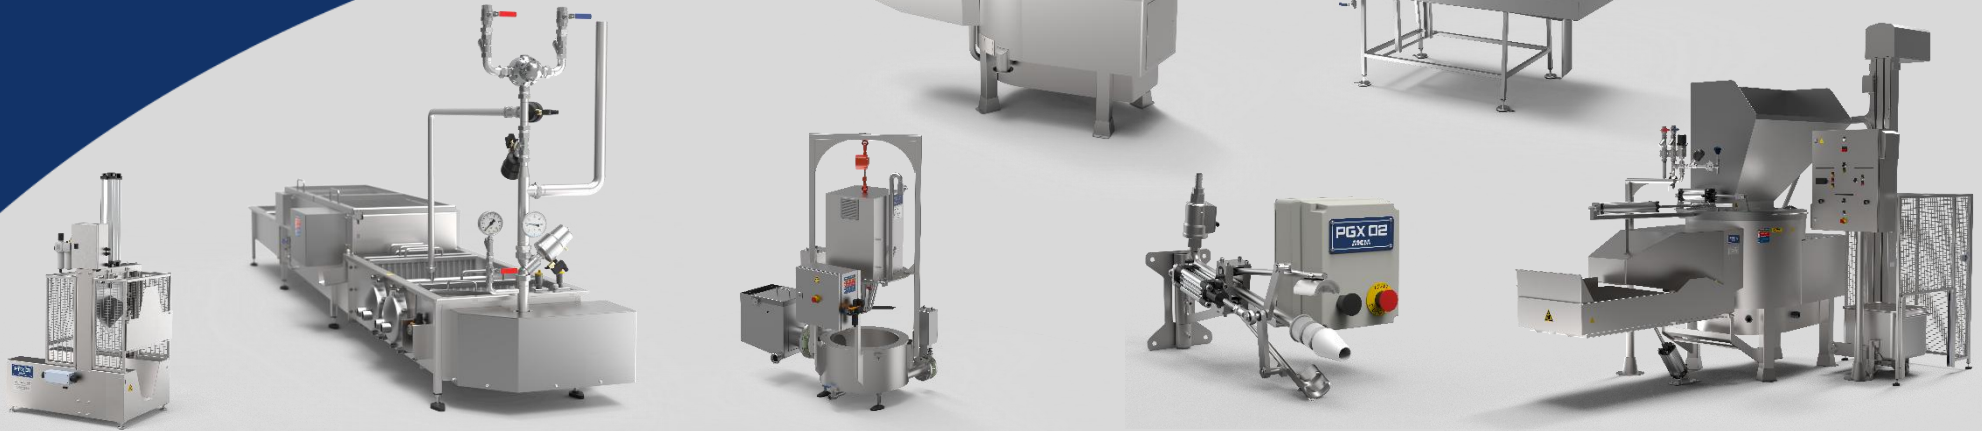

Technical specifications

| | CDX D1 / G1 | CDX T1 |
|--------------------------------|-------------|--------|
| Type | simple | double |
| A | 2170 | |
| B | 650 | 1110 |
| C | 1340 | |
| D | 685 | |
| E | 850 | |
| F | 1060 | |
| Bladders yield (/h) | 100 | 200 |
| Motor power (KW) | ± 0.8 | ± 1.6 |
| Cold water consumption (l/h)*1 | 1000 | 2000 |

*1 Varie suivant le réglage de la vanne d'entrée d'eau.
