Cause a well-split bible

is a well-washed bible.

FFX

SERIE

Why choose the MCM FFX bible splitter ?

MCM has been a manufacturer, integrator and process consultant since 1990.

The **FFX** splitter is capable of splitting and slightly opening your beef bibles in a significantly reduced time and with no effort.

Its semi-automated operating principle*¹ allows the operator to easily cut the bible, without any danger or risk of musculoskeletal disorders.

Requiring only an air and water supply*², its installation is simple and quick. Likewise, the risk of failure is minimized, and maintenance is made easier.

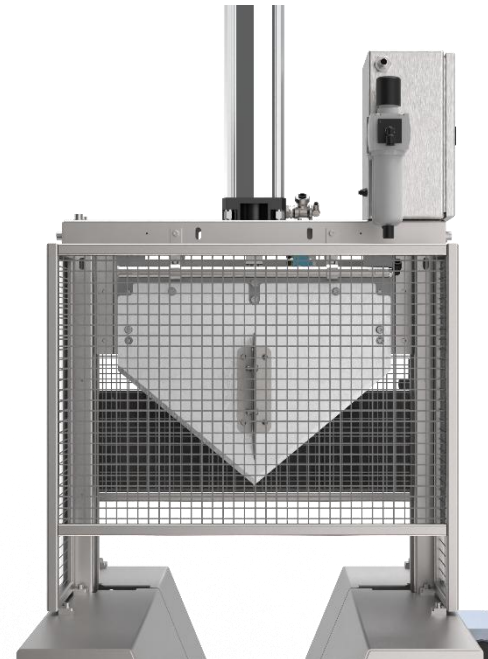

Our cutting blades, made from a patented stainless steel, are specially treated to enhance their cutting quality and lifespan.

Its compact design allows for easy integration into your processing line while improving cutting quality compared to a manual method.

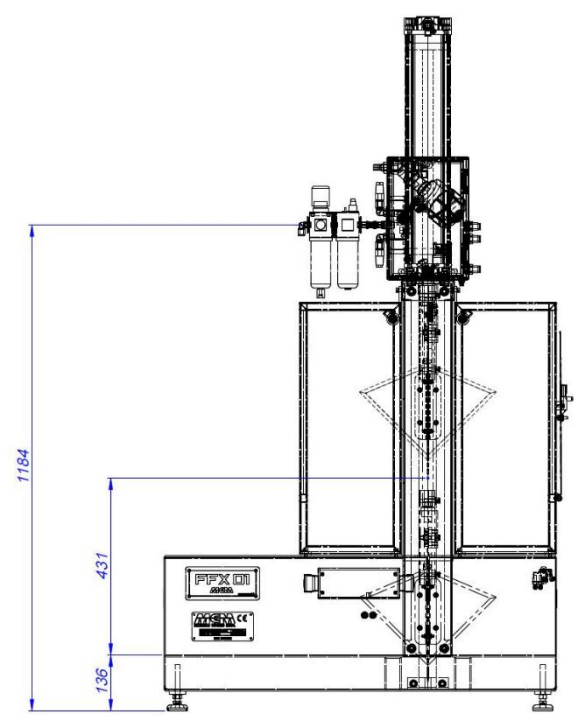

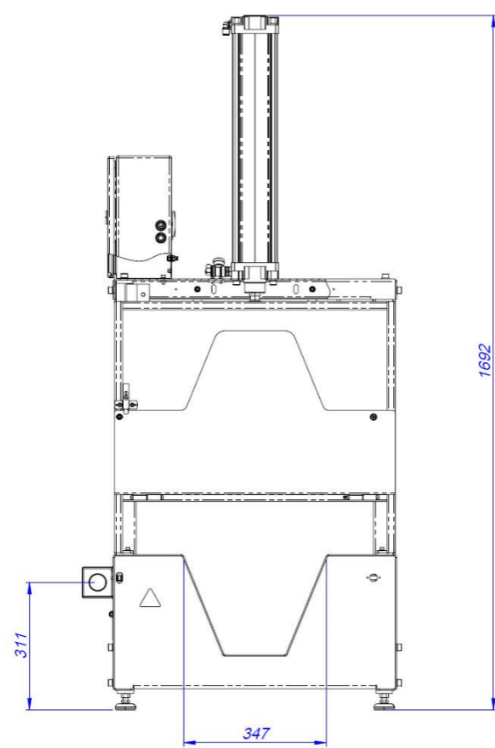

*¹ Activated by a two-handed control, with adjustable timing. *² For rinsing the blade between cycles.

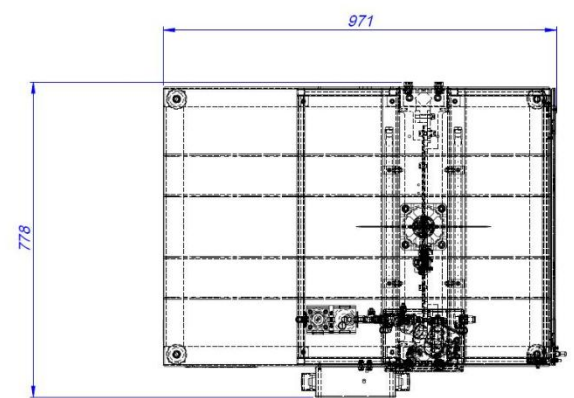

Tailored to your needs.

Since your needs are special to us, your **FFX** is tailored, modified and equipped by our teams.

Technical specifications

	FFX01
Beef bibles yield (/h)	90
Compressed air pressure (bars)	6
Cold water pressure (bars)	2 - 3
Air consumption (l/h)*1	320
Cold water consumption (l/h)*1	150

*1 For reference, depending on the number of cycles per hour and timing settings. Please contact us for further information.
