Less waste, more profits.

Collect more mucus, grind your threads.

BFX

SERIE

Why choose the MCM BFX thread grinder ?

MCM has been a manufacturer, integrator and process consultant since 1990.

The **BFX** is designed to grind the threads collected from the gut scraping lines, allowing the extraction of mucus for valorization.

Our **cutting blades**, made from a patented stainless steel, are specially **treated** to enhance their cutting quality and lifespan.

The treatment process is available in either manual or **automatic** mode. Thus, no further intervention is needed. The cycle starts with a set delay according to your needs.

Designed to be **safe** for both the operator and the maintenance technician, the **BFX** is equipped with mechanical and electrical safety features to prevent the risk of injury.

The design of the **BFX** is specifically developed to **simplify** periodic maintenance operations. With its integrated **lifting arm**^{*1}, blade replacement becomes a quick and effortless task, allowing for easy access and minimal downtime.

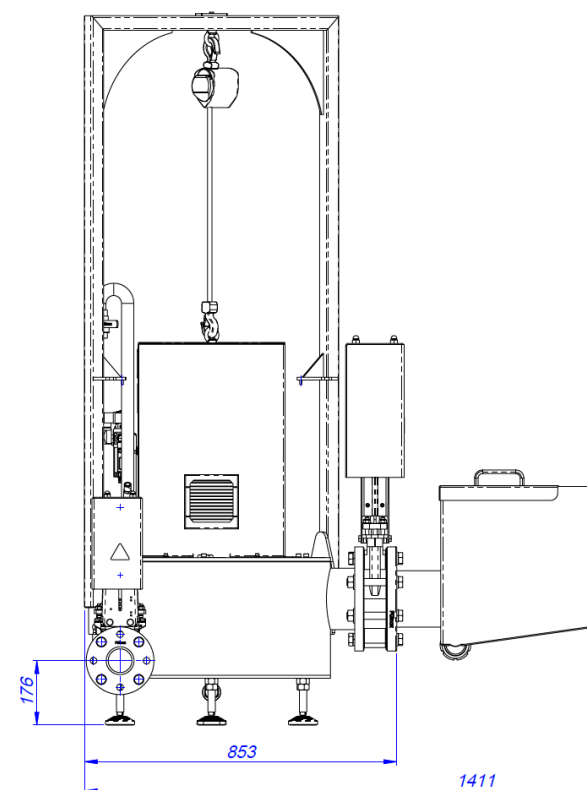

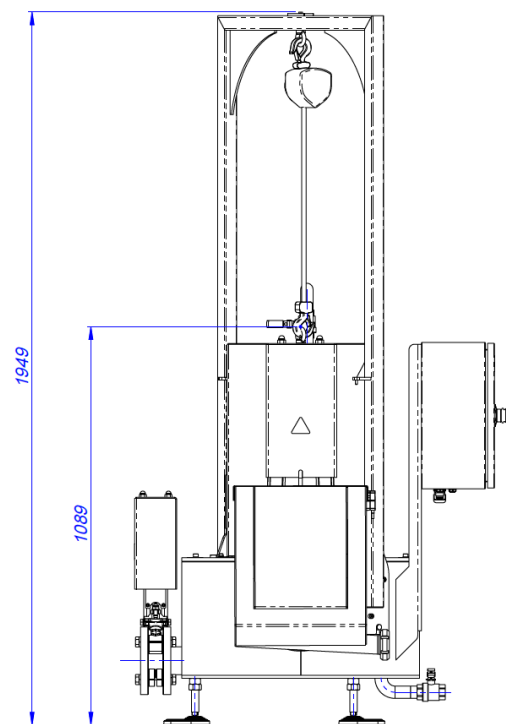

^{*1} depending on the chosen option(s)

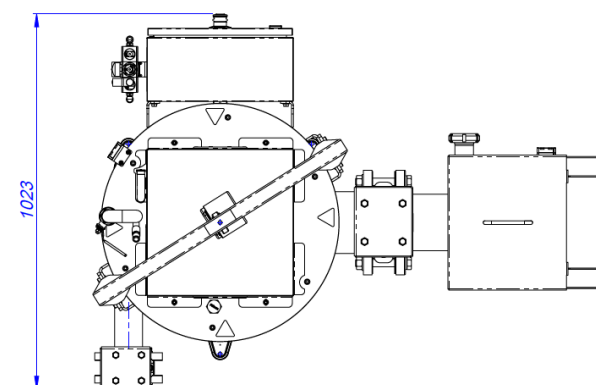

Tailored to your needs.

Since your needs are special to us, your **BFX** is tailored, modified and equipped by our teams.

Technical specifications

	BFX 01
Capacity (l)	20
Motor power (KW)	± 7.5
Air consumption (l/h)*1	500

*1 Depending on the setting of the air inlet valve.
